South: SCZ (Smart Code Zone) / Vacant
East: SCZ (Smart Code Zone) / Vacant
West: SCZ (Smart Code Zone) / Vacant

PLAN EL PASO DESIGNATION: G2, Traditional Neighborhood (Walkable)

APPLICATION DESCRIPTION

The applicant proposes to subdivide 4.25 acres for a smart code development including 50 townhome lots, 9 single family lots and 9 open space sites. The townhome lots range between 900 and 1,100 square feet. Single family lots range between 4,500 and 17,000 square feet. Primary access to the subdivision is proposed from Festival Drive. The applicant is proposing 4 private streets to serve the townhome sites. This application is being reviewed under Title 21 (SmartCode) and is required to comply with the approved Montecillo Regulating Plan.

DEVELOPMENT COORDINATING COMMITTEE

The Development Coordinating Committee recommendation is pending, subject to the following comments:

Planning Division Recommendation

Staff's recommendation is pending for Montecillo Unit Nine East on a Resubdivision Combination basis subject to the following comments:

1. No combination of two streets intersecting a third shall have their centerlines off-set any less than the distance specified in Table 19.15-4. The city manager or designee may grant an exception where infill, topographic or other physical features render the required off-set unnecessary or impractical. Provide letter requesting exception.
2. The street configuration of Vin Bugarra varies along its length; the applicant will reconfigure this street to be consistent with the proposed cross section along its entire length.
3. Recording of Montecillo Unit 9 East will be subject to the prior recording of Montecillo Unit 4 "A" to provide vehicular access and utility service.
4. Recording of Montecillo Unit 9 East will be subject to the approval of a regulating plan amendment reflecting the layout of the plat.
5. The applicant will submit covenants in accordance with 19.15.050.D.7 for the proposed private streets.
6. The applicant will revise the subdivision boundary of Montecillo Unit 4 "A" to coincide with the proposed subdivision boundary and provide appropriate and equivalent street classifications on both plats.

Plan El Paso Goals & Policies

The applicant's proposal meets the following Plan El Paso's goal and policies:

Goal 2.2: The City of El Paso should change its growth pattern away from homogeneous land uses and return to a pattern of compact well-connected mixed-use neighborhoods.

Policy 2.2.2: The design of new neighborhoods and additions to existing neighborhoods should strive for a mix of housing types to create neighborhoods that accommodate diverse ages and incomes and allow residents to trade up, downsize, or create multi-generational households without being forced to leave the neighborhood. Housing types include both small and large single-family detached homes, duplexes, townhouses, multi-family buildings, live-work units, and accessory dwelling units, and include both rental apartments and units that can be owned by their occupants.

Policy 2.2.6: The design of new neighborhoods and additions to existing neighborhoods should strive for a balance of housing, jobs, shopping, recreation, and civic uses to avoid unnecessary travel and reduce infrastructure and public services costs.

Planning & Inspections Department – Long Range Planning

1. A Preliminary Building Scale Plan for the area of this plat was approved by the Consolidated Review Committee on April 28, 2016 (PLBS16-00002).
2. Prior to the issuance of building permits, a Final Building Scale Plan shall be submitted for approval by the Consolidated Review Committee.
3. Prior to or concurrent with approval of a Final Building Scale Plan, a Regulating Plan Adjustment shall be submitted for approval by the Consolidate Review Committee reflecting the changes to street layout and thoroughfare assignment depicted in this plat and the approved Preliminary Building Scale Plan.

Planning and Inspections Department - Land Development

We have reviewed subject plats and recommend **Approval**.

The Developer/Engineer shall address the following comments.

1. Label street classification on each of the typical street cross section details.
2. Verify typical street cross section for Vin Bugarra Place.

Capital Improvement Program – Parks

We have reviewed **Montecillo Unit Nine East**, a major combination plat map and on behalf of CID Parks & Planning Division we offer Developer / Engineer the following comments:

Please note that this subdivision is zoned "SCZ" (Smart Code Zoning) therefore not required to comply with the parkland dedication ordinance Title 19 – Subdivision & Development Plats, **Chapter 19.20 - Parks & Open Space**, however, applicant needs to comply with Title 21 Smart Code Civic Space requirements and with approved Amended Montecillo Development Regulating Plan.

Also, please note that approved Amended Montecillo Development Regulating Plan (on file) doesn't show this subdivision plat meeting the required playground shed area therefore, approval of this subdivision application is subject to the following comments:

1. A playground needs to be provided with-in this area or adjacent development meeting the required playground shed area – Provide copy of an approved Amended Montecillo Development Regulating Plan verifying said requirement is in compliance.
2. Common Open Areas noted on plat shall not count towards the required Civic Space / Park space - Parks Department will not be the maintenance responsible party.

This Development is located with-in Park Zone: **NW-2**

Nearest Park: **Galatzan Park**

Capital Improvement Program – Transportation

No comments received.

El Paso Water Utilities

El Paso Water has reviewed the subdivision described above and provide the following comments: Private Drives shall be labeled as full width utility easements. A 20-foot wide easement shall be reserved for EPWater-PSB.

EPWater Comments

Water and sewer service to the subdivision is contingent upon the construction and acceptance of water and sewer mains within Montecillo Unit 4 Replat A.

Water and sewer mains shall be located in separate trenches from other utilities and with separation that complies with TCEQ.

Due to the private alley's access road constraint, El Paso Water can accommodate the water and sewer mains within a minimum 20-foot PSB utility easement. Also, the Minimum cover should be 4 feet from the top of pipe to the finished grade for 6-inch and 8-inch diameter water mains.

Water:

The subdivision requires the extension of an 8-inch diameter water main along Vin Etienne Dr. and Vin Bugarra Pl. from the future 8-inch diameter water main from Montecillo Unit 4 Replat A. The subdivision requires the extension of an 8-inch diameter water main along Vin Marbella Dr. from the future 8-inch diameter water main from Montecillo Unit 4 Replat A.

Extensions are required along Vin Raliuga Ct., Vin Benicarlo Pl., and Vin Almoradi Ct.

The subdivision will be located within an intermediate pressure zone. Private water pressure regulating devices will be required at every lot within the intermediate pressure zone. The Developer shall include in the sale of contract documents that the lot/home buyer shall acquire ownership of the above-described water pressure regulating devices to be located at the discharge side of the water meters. The lot/home buyer shall be responsible for the operation and maintenance of the above-described water pressure regulating devices.

Sanitary Sewer:

The subdivision requires the extension of an 8-inch diameter sewer main along Vin Etienne Dr. from the future 8-inch diameter sewer main from Montecillo Unit 4 Replat A.

The subdivision requires the extension of an 8-inch diameter sewer main along Vin Marbella Dr. and Vin Bugarra Pl. from the future 8-inch diameter sewer main from Montecillo Unit 4 Replat A. Extensions are required along Vin Raliuga Ct., Vin Benicarlo Pl., and Vin Almoradi Ct.

General:

The water and sanitary sewer mains mentioned above are required to be installed and accepted by EPWater-PSB prior to providing service to the subject property. The water mains are to be installed creating a looped system.

No building, reservoir, structure, parking stalls or other improvement, other than asphaltic paving (HMAC), shall be constructed or maintained on the above referenced EPWater-PSB easement without the written consent of EPWater-PSB. The Developer shall refrain from constructing rock walls, signs, buildings, curbs or any structure that will interfere with the access to the PSB easements. There shall be at least 5-foot setback from the easement line to any building, sign or structure. All easements dedicated for public water and sanitary sewer facilities shall comply with the EPWater-PSB Easement Policy. The PSB easements shall be improved to allow the operation of EPW maintenance vehicles. EPWater-PSB requires access to the existing sanitary sewer facilities within the easement 24 hours a day, seven (7) days a week.

EPWater requires a new service application to provide service to the property. New service applications are available at 1154 Hawkins, 3rd floor and should be made 6 to 8 weeks in advance of construction to ensure water for construction work. A site plan, utility plan, grading and drainage plans, landscaping plan, the legal description of the property and a certificate-of-compliance are required at the time of application. Service will be provided in accordance with the current EPWater – PSB Rules and Regulations. The applicant is responsible for the costs of any necessary on-site and off-site extensions, relocations or adjustments of water and sanitary sewer lines and appurtenances.

The applicant shall renumber the northern block to block 37 and the entire townhome block, including all private streets to block 36.

Texas Gas Company

No comments received.

Additional Requirements and General Comments:

1. Submit to the Planning and Inspections Department – Planning Division the following prior to recording of the subdivision.
 - a. Current certified tax certificate(s)
 - b. Current proof of ownership

- c. Release of access document, if applicable
 - d. Set of restrictive covenants, if applicable
2. Every subdivision shall provide for postal delivery service. The subdivider shall coordinate the installation and construction with the United States Postal Service in determining the type of delivery service for the proposed subdivision. In all cases, the type and location of delivery service shall be subject to the approval of the United States Postal Service.
3. Where private streets, common open space or other similar types of property are included as part of a planned development, the applicant shall submit documentation, subject to plan commission approval, for assuring continued retention and perpetual maintenance of common open space and perpetual maintenance and repair of private streets by restrictive covenants, deed restrictions or other methods.
4. Revise application to “Resubdivision Combination”.
