Notice of a Public Hearing was mailed to all property owners within 300 feet of the subject property on September 10, 2014. The Planning Division has not received any phone calls or letters in support or opposition to the detailed site development request.

CASE HISTORY

On November 11, 1986, City Council approved the rezoning request for the subject property from R-3 (Residential) to C-3 (Commercial) and imposed conditions by Ordinance No. 8848 (see Attachment 5). In summary, the conditions imposed by the special contract were: dedicated right-of-way for Pebble Hills Boulevard and Loop 375; Montwood extension development requirements; that land be annexed for park usage purposes; a subdivision plat be submitted; and, 20 feet of landscaping along Pebble Hills Boulevard. All of the conditions have been satisfied.

On March 2, 2004, City Council approved the rezoning for the subject property from C-3 (Commercial) to P-R II/sc (Planned Residential II). On April 8, 2004, City Plan Commission approved a detailed site

development plan for P-R II (Planned Residential II) as per section 20.10.360 C.4. in order to permit single-family dwellings.

On January 9, 2014, the CPC voted to recommend approval of the detailed site development plan for the subject property. This item is coming to CPC for additional reductions in the required front and rear yard setbacks. The CPC had previously approved a reduction in the side street yard setback to zero feet.

APPLICATION DESCRIPTION

The request is for a Detailed Site Development Plan Review as required by the special purpose district P-R II (Planned Residential II), which allows for reductions in dimensional standards through the submittal of a detailed site development plan to be reviewed by CPC and City Council per Section 20.10.360C Planned Residential P-R II. The detailed site development plan shows a 637 square-foot, 12 foot high, permanent canopy structure used as a shade area in the back yard, a 3,999 square-foot single-family dwelling, and swimming pool. The applicant is proposing the following reductions: from the required 10 feet front yard setback to zero feet, from the required 20 feet rear yard setback to 3.5 feet, and from the required 10 feet side street yard setback to zero feet. The P-R II (Planned Residential II) allows for flexibility in dimensional standards with the submittal of a detailed site development plan for CPC and City Council review. Access to the subject property is proposed from Costa Brava.

PLANNING DIVISION RECOMMENDATION

The Planning Division recommends **APPROVAL** of the detailed site development plan meets all the requirements of Section 20.04.150, Detailed Site Development Plan.

ANALYSIS

20.04.140 When required.

Except as stated herein, a detailed site development plan is required prior to development in a special purpose district or with a special permit application and may be required if a zoning condition exists on a particular piece of property. Detailed site development plans are not required for any projects for development in the Mixed Use District (RMU, GMU and IMU) or for any other projects other than those located in special purpose districts or as otherwise required herein.

Note: Detailed Site Development Plan review is required because of special purpose district on the subject property.

20.04.150 Procedure.

- D. City plan commission approval. Pursuant to this Code, the city plan commission, in addition to the powers and duties identified in this chapter, shall have final authority on approval of all other detailed site development plans, unless a zoning condition, contract provision, other city code provision or state law require the detailed site development plan to be approved by city council.
1. The planning division shall make its recommendations to the city plan commission within thirty days after a complete application is submitted.
 2. The city plan commission shall hold a public hearing at its regular meeting that is within thirty days from receipt of department recommendations.
 3. The commission shall consider the following information when approving a proposed detailed site development plan: the boundaries of the tract proposed for development; location and arrangement of structures; determine if the use conforms to applicable zoning regulations, determine if historic landmark commission approval has been granted for architectural design of all structures if located in a historic district and the design conforms to such approval; location of utility rights-of-way and easements and stormwater drainage; vehicular and pedestrian ways; on-site parking areas; location of open spaces and landscape planted areas.

4. In no instance shall the city plan commission have authority to vary the yard standards applicable to the district.
5. The city plan commission shall approve the plan if it complies with all applicable code provisions.

Planning Staff has reviewed the detailed site development plan, which meets all requirements of 20.04.150, Detailed Site Development Plan, and is recommending approval.

Plan El Paso- Future Land Use Map Designation

All applications for detailed site plan review shall demonstrate compliance with the following criteria:

G-4 – Suburban (Walkable): This sector applies to modern single use residential subdivisions and office parks, large schools and parks, and suburban shopping centers. This sector is generally stable but would benefit from strategic suburban retrofits to supplement the limited housing stock and add missing civic and commercial uses.

The purpose of the P-R II (Planned Residential II) district is to encourage planned developments as a means of creating a superior living environment through unified planning and building operations at higher residential densities. The regulations of the district are designed to encourage variety in housing needed to meet changing housing demands and to provide adequate community facilities well-located with respect to needs; to protect the natural beauty of the landscape; to encourage preservation and more efficient use of open space; to offer an opportunity for design flexibility; and encourage innovations which may result in improved relationships between uses of different types and between land uses and transportation facilities.
