13. Planning Report: Drainage and Ponding
Staff Contact: Kareem Dallo, (915) 541- 4425, dallokf@elpasotexas.gov

Kareem Dallo, Engineering Division Manager, gave a brief power point presentation and gave a brief history on park ponds. He noted that in 2008 the ponds were limited to 25 feet in depth and the design procedures were limited and did not give the designer a chance to explore other options.

He also noted that after 2008, the City and the El Paso Water Utility wrote the Drainage Design Manual. The Drainage Design Manual limited the depth of the ponds to 20 feet. He also noted that the Drainage Design Manual and Grading Ordinance encourage storm water harvesting. He outlined some of the potential ideas stating that streets design shall include a swale and perforated pipe located at the median or in the parkway. All landscaping in commercial areas should be depressed. Hopefully by the end of this year or by January of next year the City and PSB will provide a chart and a design for harvesting storm water.

Commissioner Borden suggested revisiting this item on a regular basis.

Staff suggested that the commission form a committee to address some concerns regarding vesting.

Carlos Gallinar noted that PSB is going to bring back some recommendations not only on green low impact development ideas but also amendments to the drainage design manual.

Jorge Azcarate with CEA Group noted that most developers prefer park ponds and noted that some of the concepts presented by Mr. Dallo are going in the right direction.

Gonzalo Cedillos with EPWU/PSB Storm Water noted that they are making some revisions to the Urban Design Manual and answered questions from the Commission.

No action was taken.
