SURROUNDING ZONING AND LAND USE

North: C-4/c (Vacant)
South: C-4/c (Vacant)
East: C-4/c (Vacant)
West: C-4/c (Vacant)

PLAN EL PASO DESIGNATION: G7, Industrial and/or Railyards

APPLICATION DESCRIPTION

The applicant proposes to subdivide approximately 9.960 acres of vacant land for one commercial lot. This subdivision is located south of Transmountain and east of Resler. Primary access to the subdivision is proposed from Transmountain Road. This development is being reviewed under former subdivision ordinance.

The applicant is requesting the following modification:

- A modification of the Multi Family & Commercial/Industrial Local Street 2 (Cimarron Medical Drive) cross section consisting of a 56-foot right-of-way, 10-foot parkways and a 36-foot roadway is requested to allow for the introduction of an 8-foot raised median at the Trans Mountain Road entrance only. A reduction of the driving lanes to a width of 14 –feet is being proposed to accommodate for the proposed raised median.

DEVELOPMENT COORDINATING COMMITTEE

The Development Coordinating Committee recommends **approval** of modification requests and **approval** of CMC Commercial Unit 2 Subdivision on a Major Combination basis subject to the following comments:

Planning Division Recommendation:

Planning recommends **approval** of modification requests and **approval** of CMC Commercial Unit 2 Subdivision on a Major Combination basis.

City Development Department - Land Development

We have reviewed subject plats and recommend Approval.

The Developer/Engineer needs to address the following comments:

1. Dedication statement should read “drainage, access, and utility easement”.
2. Label and dimension R.O.W. width on final plat.
3. Add note to general notes on preliminary and final plats: Retention of all developed storm-water runoff within this subdivision is required.
4. The proposed subdivision is located near a potential sediment flow source. The Engineer should account for sediment volume/transportation in all calculations used to size storm-water drainage structures.
5. Dimension and label proposed pond as private or public and whether it is to be a retention or detention pond.
6. Pond maintenance road should be aligned and connect to Cimarron Medical Drive ROW and also to 25’ drainage easements.
7. All proposed drainage improvements shall be secured within easements and shall be illustrated, labeled, and identified on the plats.
8. Secure easements for any improvements outside of subdivision limits, i.e. (the drain pipe with headwalls and rip/rap).
9. Mitigate storm-water surface flow erosion from the northwest pond near the access ramp.
10. Provide north arrow and scale on main plan view.
11. Provide written confirmation from the adjacent property owners for de-silting basin outside subdivision boundary limits.

Parks and Recreation Department

We have reviewed **CMC Commercial Unit Two**, a major combination plat map and offer Developer / Engineer the following comments:

Please note that this subdivision is zoned "C-4/c" meeting the requirements for Multi-family dwellings use with a minimum lot area of 750 sq. ft. per dwelling however, applicant has submitted preliminary covenants restricting the use to general commercial purposes only and prohibiting all residential uses therefore, "Park fees" will be assessed based as follows:

1. **If** gross density waiver is granted by the Planning Department or designee and a copy of the final recorded covenants is provided restricting all residential uses, then applicant shall be required to pay "Park fees" in the amount of **\$9,960.00** based on Non-residential subdivision requirements calculated as follows:

Non-residential acreage 9.96 (rounded to two decimals) @ \$1,000.00 per acre = **\$9,960.00**

Please allocate any generated funds under Park Zone: **NW-10**

Nearest Parks: **Desert Springs #2** & **Cimarron #1**

If density/acreage is increased /decreased or the property zoning /use changes, then "Parkland /fees" will be re-assessed based on applicable conditions.

El Paso Water Utilities

We have reviewed the subdivision referenced above and provide the following comments:

1. EPWU can only provide water services at a maximum service elevation of 4095 ft. with 35 psi at the water meter on the street right-of-way.
2. Easements that will accommodate public water and sewer main shall be labeled PSB easements and are for the exclusive use of EPWU-PSB.
3. The subject property is located within the City of El Paso Westside Impact Fee Service Area. Impact fees will be assessed at the time of plat and collected by EPWU prior to the issuance of a Building Permit.

EPWU-PSB Comments

Water:

4. There is an existing 24-inch diameter water transmission main along the west side of Resler Drive. No direct service connections are allowed to this main as per the El Paso Water Utilities - Public Service Board Rules and Regulations. There is also an existing 16-inch diameter water stub-out connected to this main that extends towards the east. The above mentioned water mains operate on the Coronado Country Club 1 pressure zone. EPWU hydraulic studies have determined that the maximum service elevation is 4095 ft. A water main extension within a dedicated PSB easement is required along the Transmountain frontage. The Owner/Developer is responsible for the costs of any necessary extensions.
5. Previous water pressure readings at fire hydrant #8561, located on Resler Drive, 455-feet south of Transmountain Road have yielded a static pressure of 60 pounds per square inch (psi), residual pressure of 50 psi, at a discharge of 1,482 gallons per minute.

Sewer:

6. There is an existing 12-inch diameter sanitary sewer main along the east side of Resler Drive.

Sanitary sewer service requires extension of sewer mains along the street or within dedicated PSB easements.

Reclaimed Water:

7. There is an existing 16-inch diameter reclaimed water (non-potable) main along Resler Drive.

General

8. All easements dedicated for public water and sanitary sewer facilities shall comply with the EPWU-PSB Easement Policy. PSB easements shall be improved to allow the operation of EPWU maintenance vehicles. EPWU-PSB requires access to the proposed PSB facilities within the easements 24 hours a day, seven (7) days a week. No building, reservoir, structure, or other improvements, other than asphaltic pavement (HMAC), shall be constructed or maintained on the above referenced EPWU-PSB easements without the written consent of EPWU-PSB.

9. EPWU requires a new service application to serve the subdivision. New service applications should be made 6-8 weeks in advance of construction to ensure water for construction work. The following items, if applicable, are required at the time of application: (1) hard copy of subdivision plat with addresses; (2) finalized set of improvement plans, including storm sewer; (3) digital copy of subdivision plat; (4) benchmark check; and (5) construction schedule; and (6) a certificate of compliance. Service will be provided in accordance with the current EPWU – PSB Rules and Regulations. The owner is responsible for the costs of any necessary on-site and off-site extensions, relocations or adjustments of water and sanitary sewer lines and appurtenances.

Canutillo Independent School District

No comments received.

Additional Requirements and General Comments:

1. Submit to the City Development Department – Planning Division the following prior to recording of the subdivision.
 - a. Current certified tax certificate(s)
 - b. Current proof of ownership
 - c. Release of access document, if applicable
 - d. Set of restrictive covenants, if applicable

2. Every subdivision shall provide for postal delivery service. The subdivider shall coordinate the installation and construction with the United States Postal Service in determining the type of delivery service for the proposed subdivision. In all cases, the type and location of delivery service shall be subject to the approval of the United States Postal Service.

Reference: **Street Cross-Section Modification Request - REVISED**
CMC Commercial Unit Two

Dear Mr. Austin:

On behalf of the Property Owner's, we present this letter requesting a modification of the subject plats street cross-section right-of way (R.O.W.). The modification request as per section 19.04.170.A is as follows:

- A modification of the Multi Family & Commercial/Industrial Local Street 2 cross section consisting of a 56-foot R.O.W., 10-foot parkways, and a 36-foot roadway, is requested to allow for the introduction of an 8-foot raised median at the Trans Mountain Road entrance only. A reduction of the driving lanes to a width of 14-feet each is being proposed to accommodate for the proposed raised median. No width reductions relative to the parkway and overall R.O.W. are being requested for this modified cross-section.

Should you have any questions, please feel free to contact me at (915) 877-4155, ext. 121 at any time.

Thank you for your assistance with this matter.

Sincerely,

CSA DESIGN GROUP, INC.

Adrian I. Holguin-Ontiveros, E.I.T., CFM
Senior Project Engineer
