Application Filed: 09/09/2013
45 Day Expiration: 10/24/2013

ITEM #1

GENERAL INFORMATION:

The applicant seeks approval for:

Certificate of Appropriateness for the enclosure of the front porch at the main façade after-the-fact.

STAFF RECOMMENDATION:

The Historic Preservation Office recommends DENIAL of the proposed scope of work based on the following recommendations:

The Design Guidelines for El Paso's Historic Districts, Sites, and Properties recommend the following:

- *Porches are functional as well as decorative features that help to define the overall character of a building. Many buildings feature porches, which are one of the most common architectural features. A porch and all of its architectural elements should be maintained and repaired.*
- *Doors and windows are considered important character-defining features because of significant detailing.*
- *Retain and preserve the pattern, arrangement, and dimensions of door and window openings on principal elevations. Often the placement of doors and windows is an indicator of a particular architectural style, and therefore contributes to the building's significance. Doors and windows for new construction and additions should be compatible in proportion, location, shape, pattern, size, and details to existing units.*
- *New construction should utilize doors and windows of compatible size, style, and material in an appropriate pattern so as not to detract from the historical significance of the existing building.*

The Secretary of the Interior's Standards for Rehabilitation recommend the following:

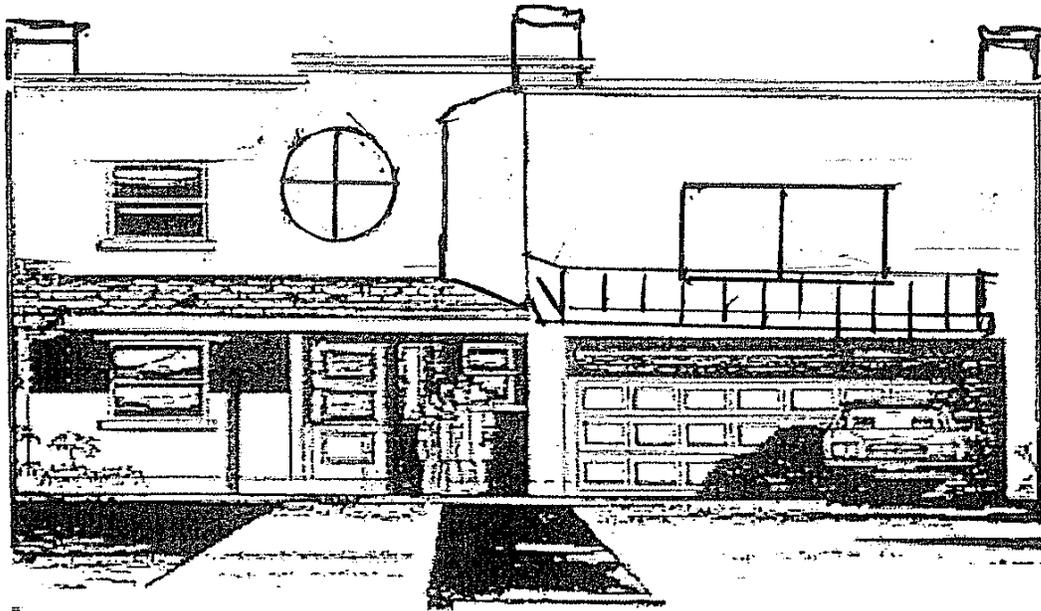

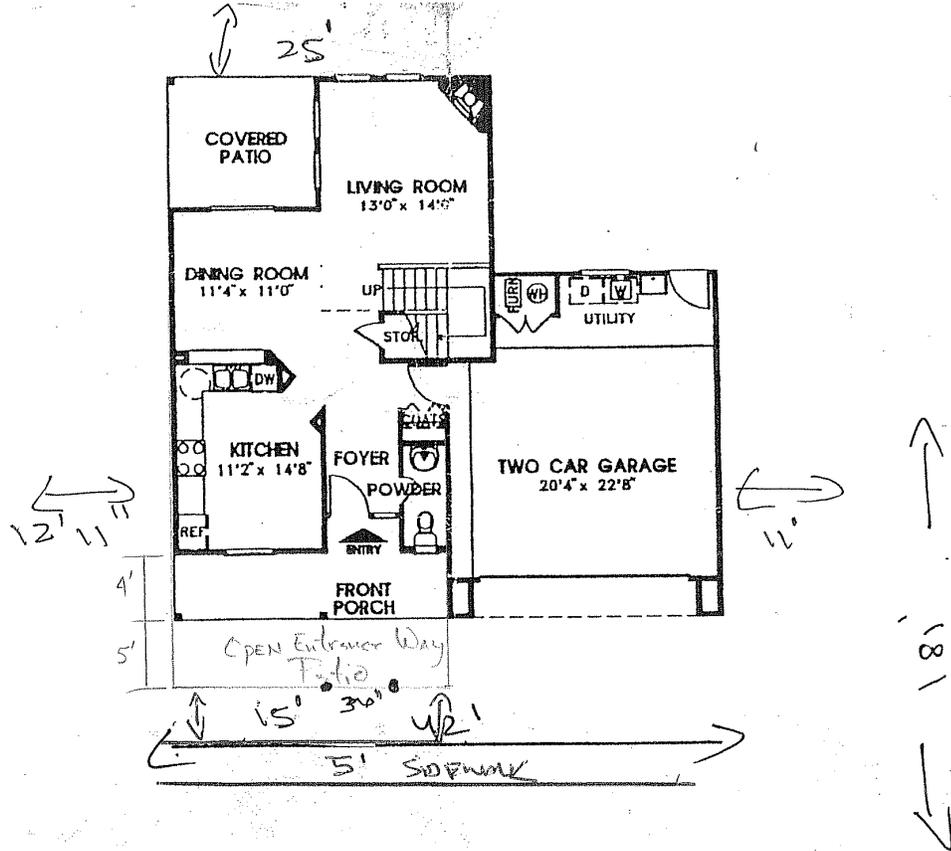

- *New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work shall be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.*
