**Application Filed:** 11/7/2013  
**45 Day Expiration:** 12/22/2013

### ITEM #3

## **GENERAL INFORMATION:**

The applicant seeks approval for:

Certificate of Appropriateness to modify a previously approved addition to include a gabled roof, changes to the approved façade, the replacement of a window, installation of a walkway, and roof alteration after-the-fact.

## **STAFF RECOMMENDATION:**

The Historic Preservation Office recommends APPROVAL WITH MODIFICATIONS of the proposed scope of work based on the following recommendations:

*The Design Guidelines for El Paso's Historic Districts, Sites, and Properties* recommend the following:

- New additions should be designed and constructed so that the character-defining features of the historic building are not radically changed, obscured, damaged or destroyed in the process of rehabilitation.
- Locate additions carefully so they do not damage or conceal significant building features or details.
- It is not appropriate to introduce an addition if it requires the removal of character-defining building features such as patios, mature vegetation or a detached structure.
- Design an addition so it is compatible in roof form, proportions, materials and details with the existing structure.
- Design an addition so that if removed in the future, the historic building's form and character defining features are not obscured, damaged, or destroyed.
- Introduce new driveways and walkways (when there are none) that are compatible with existing driveways and walkways in terms of width (maximum 12' wide), location, materials, and design.
- Do not change the style or construction of the roof.
- Construct new driveways and walkways in locations that require a minimum of alteration to historic site features such as landscaping, retaining walls,

curbs, and sidewalks. Usually driveways should lead directly to the rear of buildings and walkways should lead directly to the front steps of the house.

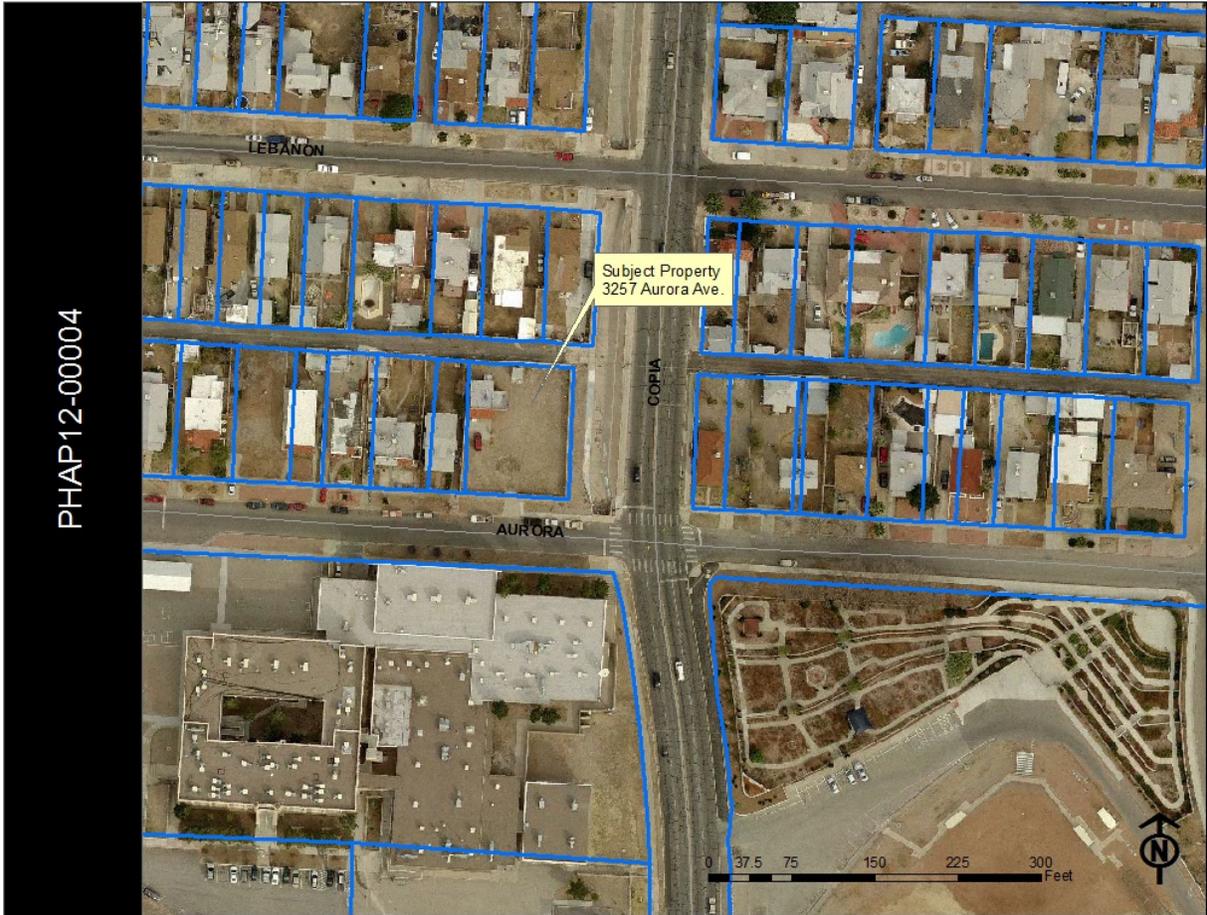

- The size of the door or window opening should not be altered. New doors and windows should be constructed to fit into the existing opening.
- If windows are damaged beyond repair, replacement windows should match the type (such as double hung), style (for example six panes over six panes), and finish (paint).

*The Secretary of the Interior's Standards for Rehabilitation* recommend the following:

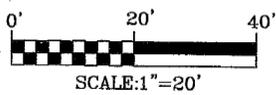

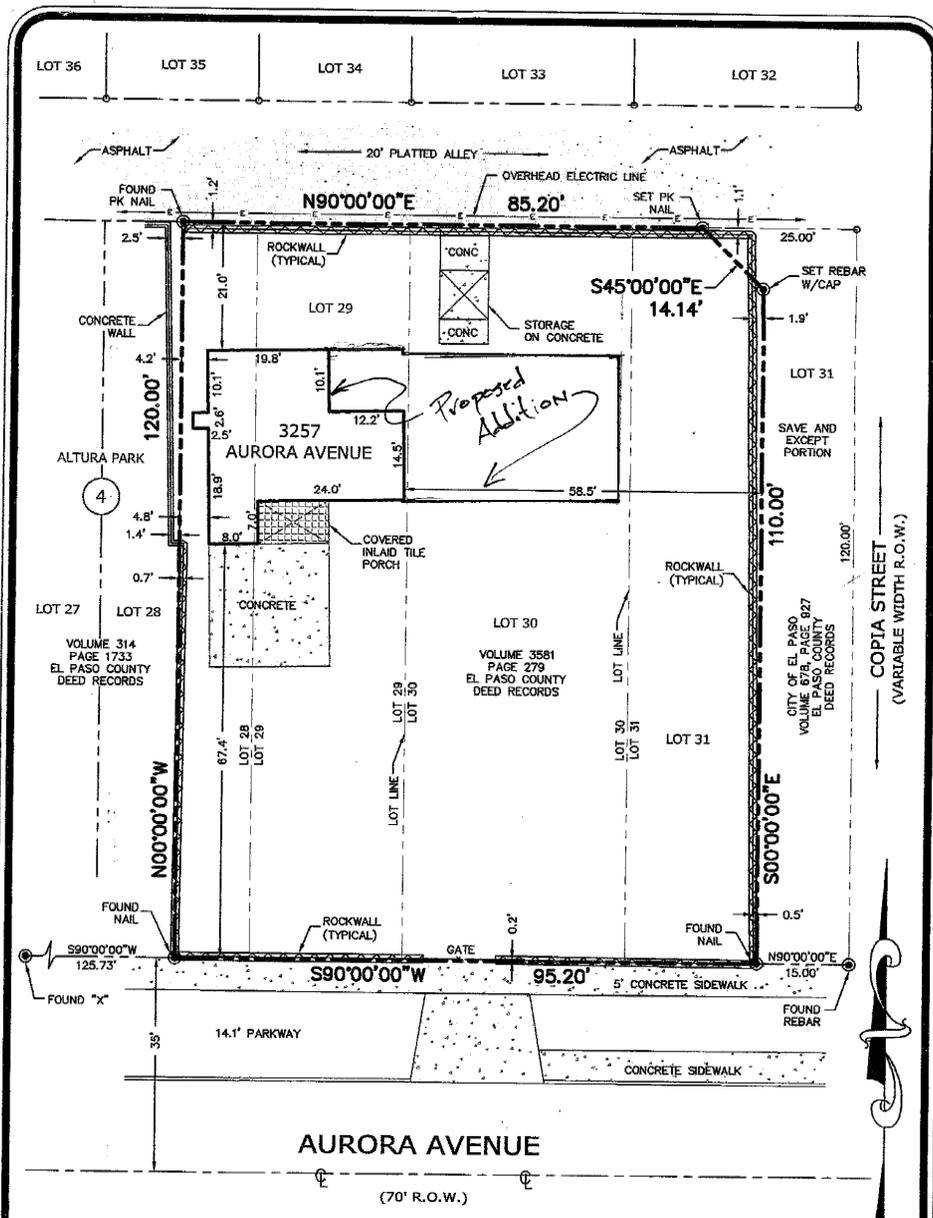

- New additions will not destroy historic materials, features, and spatial relationships that characterize the property.
- The new work shall be differentiated from the old and will be compatible with the historic materials, features, size, scale, and proportion, and massing to protect the integrity of the property and its environment.

The modifications are that the current roof be reconstructed so that it becomes a flat roof as shown in the drawings approved by the HLC in March 2012 and that the original window on the original structure be replaced to match the previous window in terms of size, operation, configuration, details, and finish.
