SOLE SOURCE AFFIDAVIT

THIS IS AN OFFICIAL PURCHASING DOCUMENT - RETAIN WITH PURCHASE ORDER FILE

Before me, the undersigned official, on this day, personally appeared David L. Michaels, a person known to me to be the person whose signature appears below, whom after being duly sworn upon his/her oath deposed and said:

1. My name is David L. Michaels. I am over the age of 18, have never been convicted of a crime and am competent to make this affidavit.
2. I am an authorized representative of the following company or firm: Signature Technologies, Inc. dba ComNet Software
3. The above named company or firm is the sole source for the following item(s), product(s) or service(s):
Eclipse 5.0 Software Upgrade
4. Competition in providing the above named item(s) product(s), service(s) is precluded by the existence of a patent, copyright, secret process or monopoly as stated under Section 252.022, Subchapter A of the Local Governmental Code 7A or as provided for under 7B-F of the same section. Also, attached hereto is a sole source letter, which sets forth the reasons why this Vendor is a sole source provider (dated and signed).
5. There is/are no other like item(s) or product(s) available for purchase that would serve the same purpose or function.
6. Note: This Vendor understands that by providing false information on this Sole Source Affidavit, it may be considered a non-responsible Vendor on this and future purchases and may result in discontinuation of any/all business with the City of El Paso.

To: Rick Black

Re: Letter of Sole Source

Dear Rick,

Com-Net Software developed and provided the proprietary software application, ECLIPSEX®, which is used in the day-to-day operation and display of the Multi User Flight Information Display System (MUFIDS) at your facility in El Paso, TX. The ECLIPSEX application running on the server and Digital Display Controllers (DDC) software share a flight information data base developed by Com-Net to include updating the public displays with graphics such as Airline logos, the real-time updating of each public display with data supplied through the client workstations of airlines operating at the El Paso International Airport.

Each monitor in the airport has a Graphics Controller that controls the page of information being displayed. The software application controlling the monitor is in constant communication with the Com-Net data base application running on the server. This connection is critical to the display function for access to flight data and providing the appropriate page layout for the specific monitor. The ECLIPSEX data base software application and the digital controller software are both proprietary to Com-Net and must be present for the successful display of flight information.

Based on this fully integrated software and hardware design, no other vendor could provide the application software or hardware without replacing the MUFIDS system that is in operation today.

Should you have any additional questions or needs, please do not hesitate to give me a call.

Sincerely,

Todd G Lucius
Senior Account Manager
