Notice of a Public Hearing was mailed to all property owners within 300 feet of the subject property on April 5, 2011.

## **APPLICATION DESCRIPTION**

This is a City-initiated rezoning for approximately 1,587 acres of property located north and south of Transmountain Road, and west of Franklin Mountains State Park. On March 29, 2011, the City Council directed the City Manager and staff to amend Title 20 (Zoning) to create a new zoning district for the purpose of preserving land for future growth as sustainable, transit served, form based code development and redevelopment, and to initiate and process this rezoning application for city-owned land. This property was included in the EPWU Westside Master Plan that was approved by City Council on May 24, 2005. The entire Master Plan area was 1,850 acres. Since that time the Public Service Board has deeded land to the Franklin Mountains State Park, and the area is now approximately 1,587 acres. It includes six roadways that are designated as arterials in the city's Major Thoroughfare Plan; Paseo del Norte is a designated major arterial that is proposed to intersect with Transmountain Road, and is included in the Texas Department of Transportation design for road improvements on Transmountain Road.

The purpose for the rezoning is to ensure that any future development in the RGD is planned and developed in accordance with Title 21, SmartCode, or in accordance with the provisions under a residential or general mixed use zoning plan that meets the LEED (Leadership in Energy & Environmental Design) certification for a Neighborhood Development Silver Rating. Prior to development RGD will be rezoned to SmartCode, GMU or RMU. RGD zoned land may be used as necessary for utility facilities and thoroughfare construction projects. Any thoroughfare construction projects shall comply with the Institute for Transportation Engineers (ITE) *Designing Walkable Urban Thoroughfares: A Context Sensitive Approach, An ITE Recommended Practice*, as amended.

## **The Plan for El Paso-City-Wide Land Use Goals**

All applications for rezoning shall demonstrate compliance with the following criteria:

- a. Goal: preserve, protect, and enhance the integrity, economic vitality, and livability of the city's neighborhoods.
- b. Goal: provide a wide range of housing types that respond to the needs of all economic segments of the community.
- c. Goal: provide a pattern of commercial and office development which best serves community needs and which complements and serves all other land uses.

The RGD means an area that has development value with open space opportunities. The land may not be available for development either due to a lack of necessary infrastructure to support development or because the land is owned by the City. Land may be zoned RGD as a means of preserving the land for sustainable, transit served, form based code development and redevelopment when such land becomes necessary to serve growth in the region. Portions of RGD zoned land may have intrinsic value as open space and may contain such features as scenic corridors, view sheds, arroyos, steep slopes, or protected habitat that should remain in its natural state once development occurs.
