

**City of El Paso
Scope of Work**

**Storm 2006: Thunderbird Diversion Channel
Solicitation No. 2007-148**

BASE BID I:

The Thunderbird Valley Channel Repairs consist of providing all labor, equipment, material and incidentals.

The project will consist of removing existing concrete channel lining, existing pavement structure and chain link fencing. The proposed work will include replacing earthwork in scoured regions, installing new reinforced concrete channel liner, replacing pipe underdrains, replacing chain link fence, and repairing areas along the concrete channel lining which are spalled, cracked and undermined at joint locations as noted per design plans. Other repairs to be made would consist of repairing damage to the adjacent property parking lot pavement structure, (The Village Apartments), where a new subgrade and pavement structure would be placed along the affected region.

BASE BID II:

The project will consist of removing existing concrete channel lining and chain link fencing. The proposed work in this bid will consist of replacing reinforced concrete channel lining as indicated on the design plans, cleaning and sealing cracks in the concrete lining, and replacing chain link fence.

The project will be accomplished as shown on the plans and specifications or as approved by the City of El Paso Engineering Department. Work shall begin in the date specified in the Notice to Proceed, and must be completed within the indicated time frame.

The description of the scope of work, as shown above, is only a general overview, the contractor shall refer to the project plans and specifications for further information.

THIS IS A UNIT PRICE PROJECT
